Daví Moraes Michaelsen

Full Stack Developer · Node.js · React · Docker · Python

Esteio, Brazil (UTC-3) · Open to remote · davimica04@gmail.com · LinkedIn · github.com/mica-davi · micadev.com.br

Summary

Full Stack Developer with 2+ years of experience building web applications with Node.js and React, integrating enterprise systems through REST and SOAP APIs, and automating business processes. Built a workflow platform that replaced a paid SaaS tool, saving about BRL 20,000 in licensing. Deploys containerized apps with Docker on Linux and uses Claude Code daily in AI-assisted development. Looking for remote roles with international teams.

Technical Skills

- **Languages:** JavaScript, Python, SQL, C++, C#
- **Frontend:** React, HTML, CSS
- **Backend:** Node.js, REST APIs, SOAP APIs, system integrations
- **Databases:** BigQuery, Oracle, SQL Server, MariaDB
- **DevOps:** Docker, Linux servers, Zabbix
- **Platforms:** TOTVS Fluig (BPM)
- **AI tools:** Claude Code (AI-assisted development)

Experience

Full Stack Developer — Maxiforja · Brazil · Sep 2026 – Present

- Built a driver self-registration system: truck drivers scan a QR code, register on their phone and scan invoices (NF-e) with the camera, which cut wait times that used to pile up at the service counter.
- Maintain the company's MES (Manufacturing Execution System), built with React and Node.js.
- Maintain the company website (React and Node.js).
- Deploy applications with Docker on Linux servers, using Claude Code for AI-assisted development.

Junior Developer — Pibernat · Brazil · Jun 2024 – Aug 2026

- Built a Pipefy-style workflow management system inside TOTVS Fluig, replacing a paid SaaS tool and saving about BRL 20,000 in licensing.
- Built a system monitoring dashboard with Node.js and React, integrated with Zabbix and the internal ticketing system.
- Integrated supplier systems running on Oracle, SQL Server and MariaDB into the company's BigQuery data warehouse.
- Automated business processes through REST and SOAP APIs (Fluig, Fcomex).

Projects

Game of Life · github.com/mica-davi/Cpp-GameOfLife · C++, raylib

- Implementation of Conway's Game of Life in C++ with real-time rendering using raylib.

Personal Portfolio · portfolio.micadev.com.br · GitHub Pages, custom domain

- Personal portfolio site hosted on GitHub Pages under my own domain.

Education

B.Sc. in Computer Science — UniLaSalle · Jun 2023 – Expected 2028

Software Development Technician — SENAI · Jun 2021 – Dec 2022

Languages

- **Portuguese:** Native
- **English:** Upper-intermediate (B2)
